Telemedica's promise to YOU

Personal Communication

Whenever you have a question, our customer service team and operations manager are never more than a click away. Our dedicated team addresses your concerns quickly and efficiently while providing a personalized experience.

Quality Providers

All Telemedica providers hold doctoral degrees in psychology from graduate programs accredited by the American Psychological Association (APA) or the Psychological Clinical Science Accredited System (PCSAS). Many of our providers have experience working directly with the Veteran community. Telemedica providers understand what the VA is looking for because they have conducted evaluations themselves and will work alongside you to make these connections.

Ongoing Training

All providers go through our Telemedica onboarding process and continually attend extensive trainings. Our team of providers includes a Quality Assurance group, as well as a doctorate level provider trainer to ensure everyone is up to speed on completing the most comprehensive evaluations.

Commitment to Our Veterans

Our Telemedica team and network of providers have one collective goal, and that is to help Veterans. Our progressive telehealth options give Veterans access to the Medical/Psych/Telemedicine services they need, when and where they need it!
